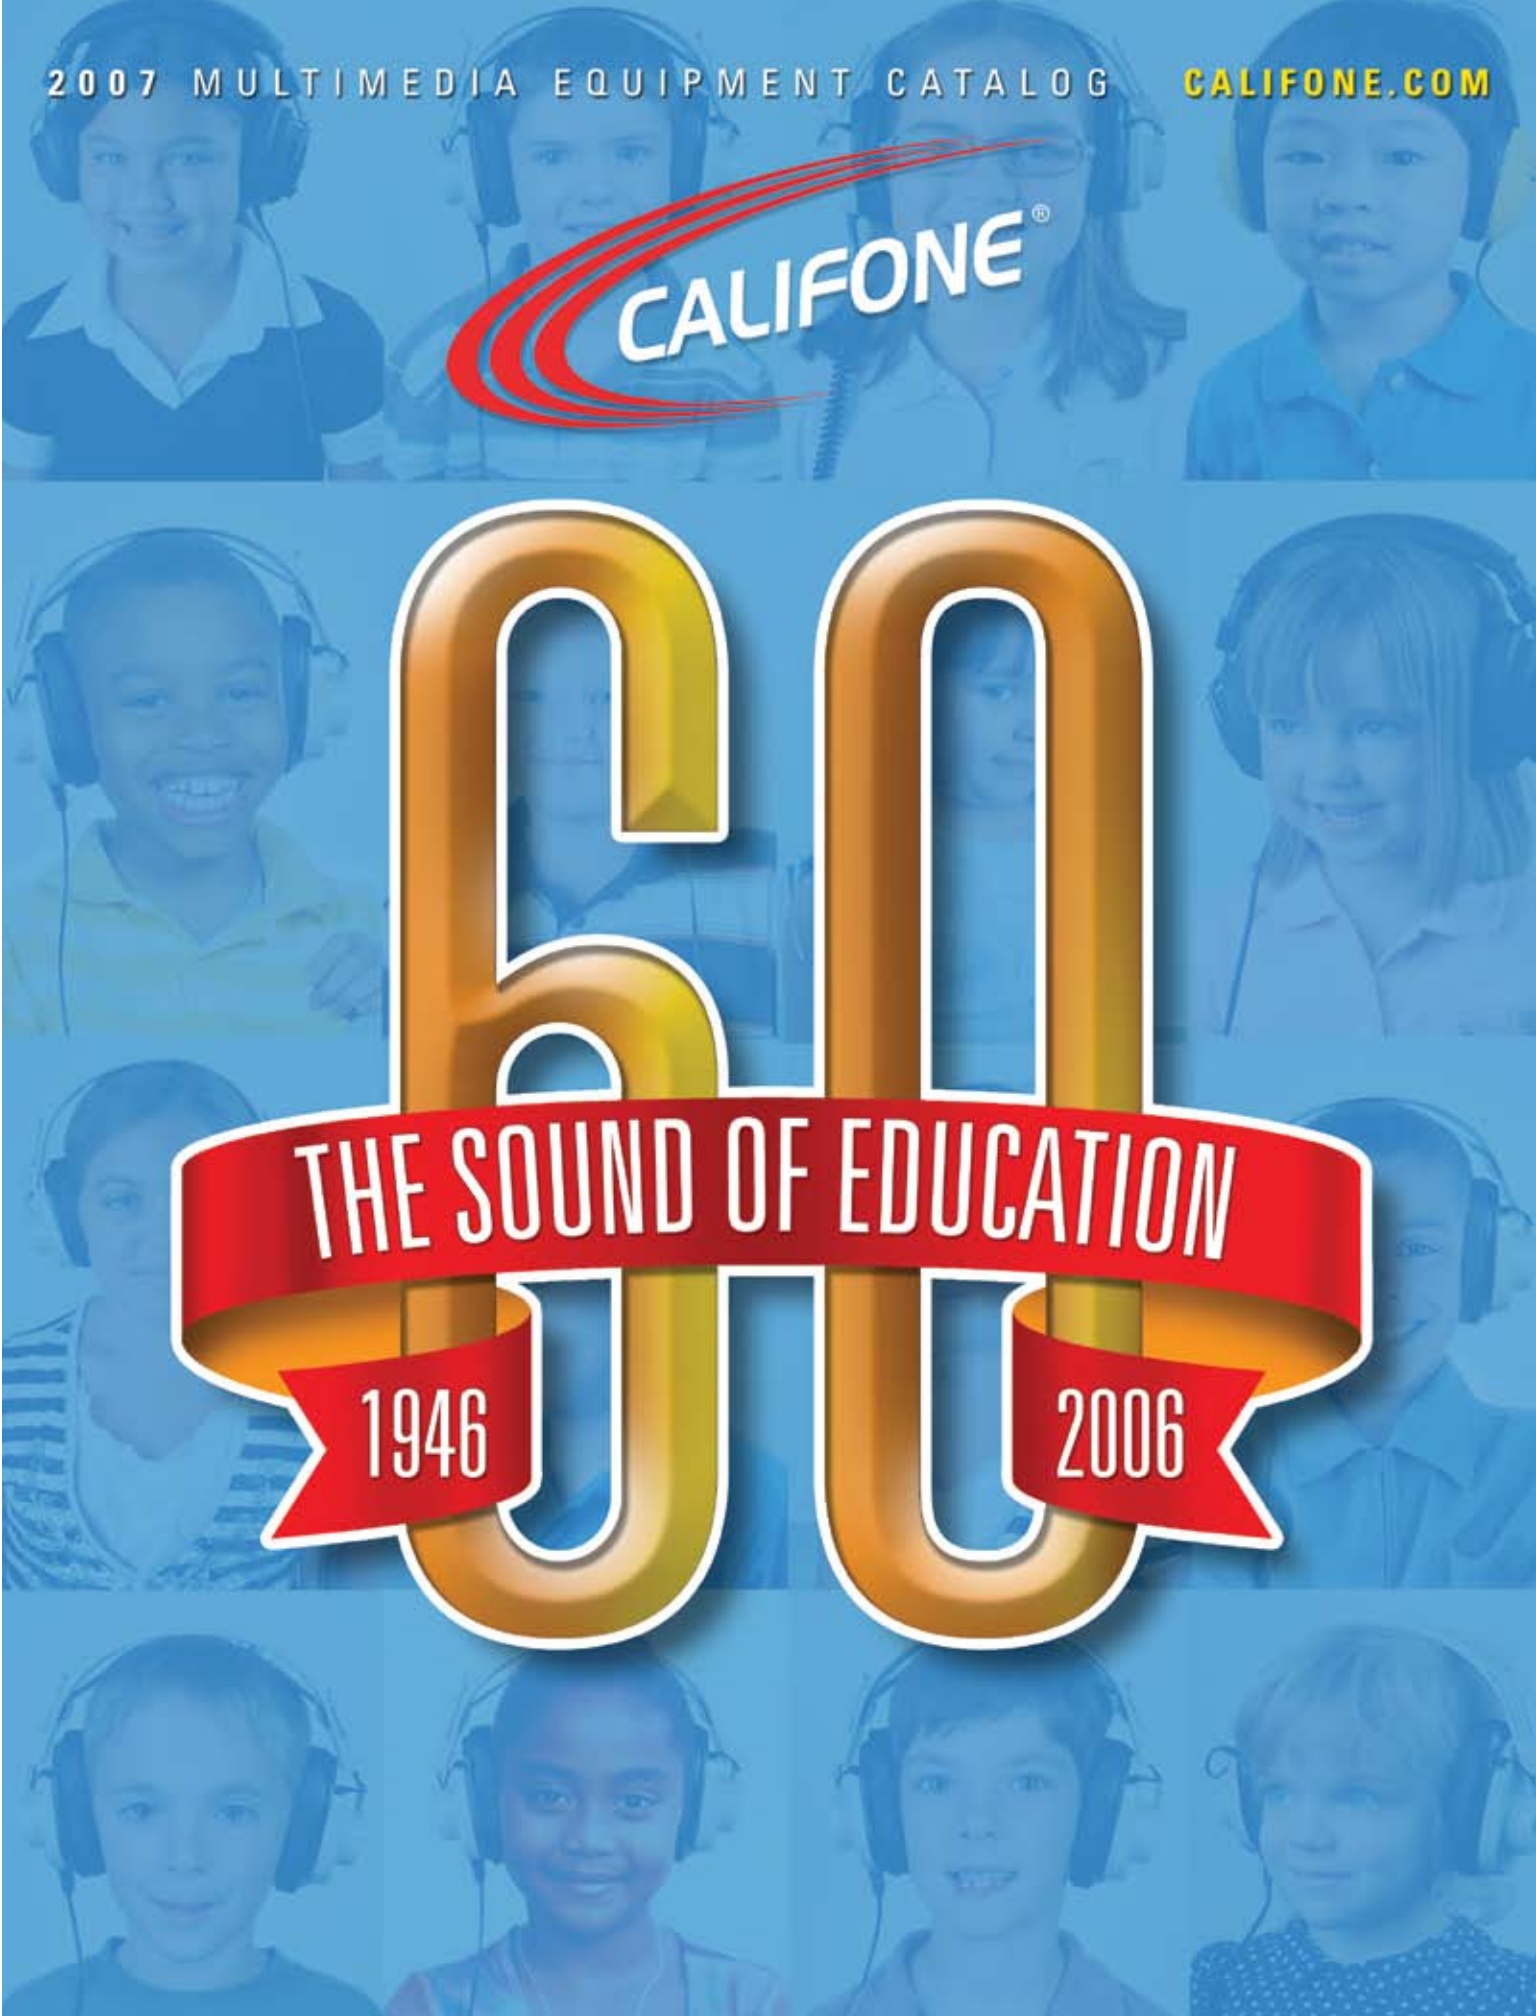
2007 MULTIMEDIA EQUIPMENT CATALOG CALIFONE.COM



Multimedia Equipment **2007 Catalog**

give every learner and every educato

CALIFONE®

Trust Califone® brand equipment *to give every learner and every educator sound solutions for individual, small group, whole class and school-wide learning.*

We Hear You…

You and your colleagues in schools everywhere have helped us build our 2007 multimedia equipment lineup. We're continuing to innovate and respond to your needs for high-performance, hard-working multimedia solutions for your classrooms, computer labs, athletic departments and libraries. You've told us that you need equipment that works class-after-class, day-after-day and you want solutions that work in all learning environments.

You will find those solutions right here. In addition to the many proven products you already know and trust, **we're introducing more than 30 new items** to help you address the increasingly sophisticated needs of your programs and students. Inside are more industry firsts – the first headphones that inhibit the growth of harmful microbes on surfaces touched by students, a jackbox that integrates speech and hearing as well as a portable PA with digital recording/downloading capabilities.

Be sure to read about the details of our annual Stone Scholarship program on page 18. We hope you'll consider participating. And as always, we're eager to hear about your successes with multimedia technology. **We encourage you to share those achievements through our teacher-submitted product reports with us online at califone.com.** We're eager to work closely with you in the year ahead.

Trust Califone to deliver solutions that enhance teaching and learning while helping you integrate technology.

Califone® Warranties: *Not all warranties are created equal.*

Most buyers are unaware that warranties for consumer electronic products cover only personal use. As soon as that kind of product is taken to a school or business, the warranty is nullified because consumer electronic manufacturers do not make their products sturdy enough to support the demands of day-in and day-out school use. Any convenience in shopping at a local electronics store or national chain is offset by the significant differences in the durability of products, which were not designed to withstand the demands of a single classroom much less a learning lab or school library.

Built to a higher standard than the education industry requires, our products are C-UL/CE approved for safe use in schools and libraries and backed by our solid warranty. Our promise to you is that all Califone products are delivered to you free from defects or we will replace the item.

Purchasing products specifically designed for school uses makes sense given the potential loss of valuable instruction and learning time. We think you have enough to think about without being concerned for the safety and durability of your audio products.

Please visit us online for more details on our warranty program.

Portable PA Systems

*For Presenters... Who Need **Flexible** Audio Support*

PA300UHF-PQ
Includes PA300+UHF, wireless handheld Q-316 microphone, rugged foam-lined carry case, MB-350 mounting bracket, portable TP-30 tripod with carry case and RC-300 remote control

Count on the expanded PresentationPro™ lineup to handle both indoor and outdoor amplification needs. Engineered for quick and easy set-ups so you can integrate wired and wireless microphones, MP3 players, control audio levels remotely and even run with wireless audio from remote LCD projectors (see page 45).

PresentationPro+UHF™

Multi-use portability for classrooms, auditoriums, meeting rooms, hotels, conferences and presentations

- Accepts a) one 16-channel UHF mic and b) two wired mics at the same time
- Connects with computers and LCD projectors, multimedia players through two inputs
- LED lights give assurance with visual confirmation of power, signal and reception
- Line output to additional wired speakers for larger presentations
- 30W RMS with heaviest magnet in its speaker class (*means most efficient*)
- Rugged brass sunburst teeth won't slip or unscrew once installed
- Shared wireless mics with the PowerPro, FreedomPro, Lectern, UHF Array Speakers eliminate dedicated mic equipment needed for separate PA systems (*see page 7*)

PA300+UHF.....$366
PA300+ *Wired version only*.....$200

Califone Acoustics:

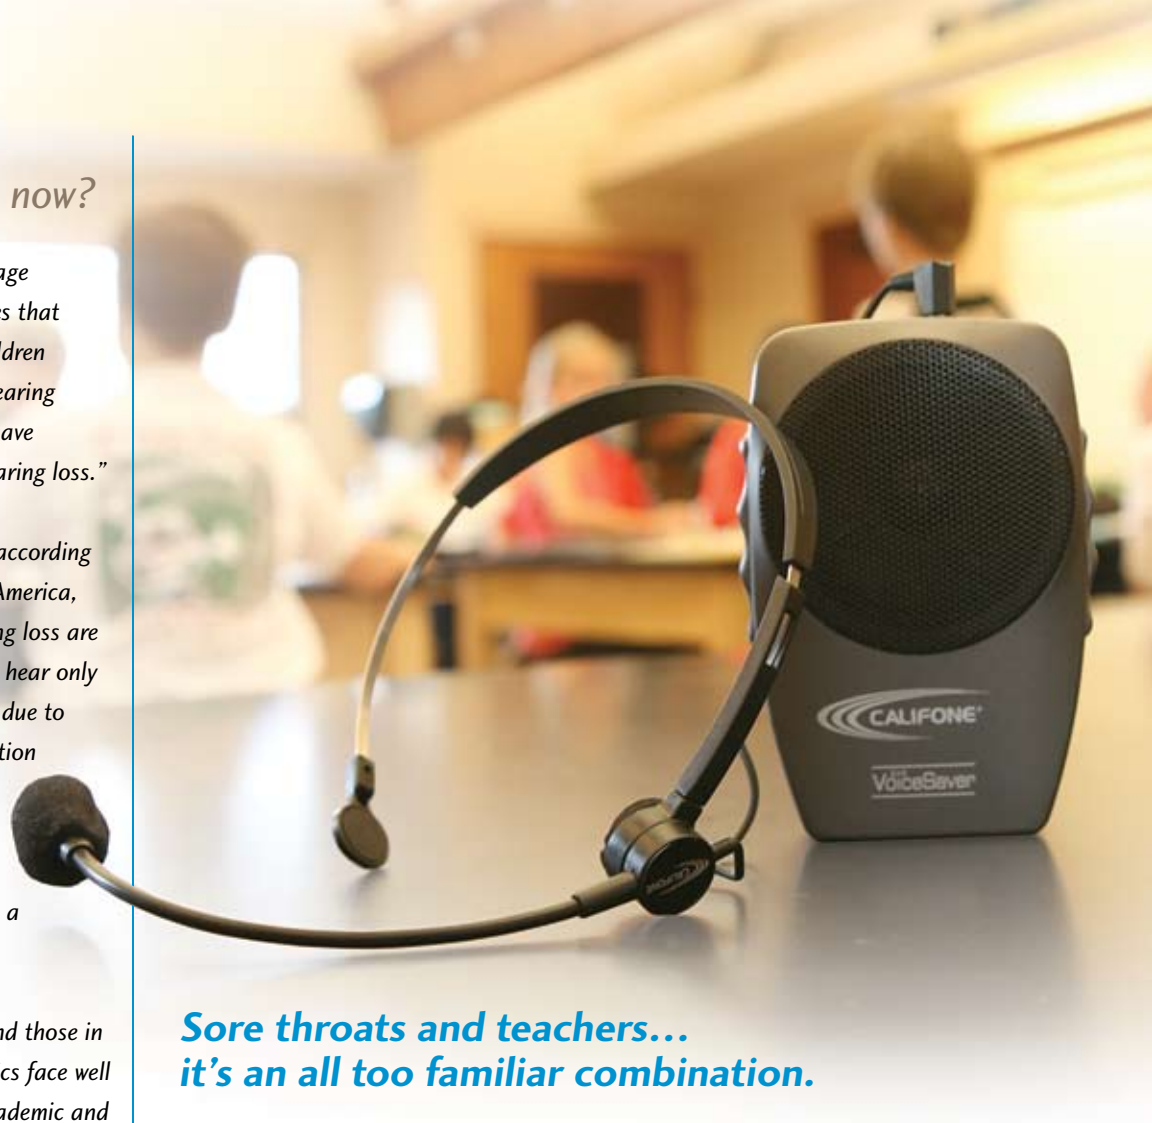
Can you hear me now?

The American Speech-Language Hearing Association estimates that more than 1 million U.S. children suffer from some degree of hearing loss, and 83 out of 1,000 have "educationally significant hearing loss."

Even more surprising is that according to the Acoustical Society of America, many students with no hearing loss are in classrooms where they can hear only three-fourths of what is said due to excessive noise and reverberation inside and outside the classroom. This means that every student can be at a learning disadvantage with or without a diagnosed hearing loss.

Students with hearing loss and those in classrooms with poor acoustics face well documented difficulties in academic and social development. Delays in speech and language development; learning problems resulting in lower achievement; social isolation and poor self-esteem as a result of communication difficulties; and lower life aspirations as an outcome of these difficulties can have lifelong consequences for students.

Califone offers a wealth of audio technology to help students hear clearly and meet a presenter's specific needs both indoors and outdoors. Portable PA systems as well as Personal PAs allow teachers to facilitate the learning process in ways that benefit every student. Frustration caused by poor acoustics and ambient noise is easily remedied with the deployment of appropriate Califone audio technology.



Sore throats and teachers… it's an all too familiar combination.

That's why Califone offers personal-sized PAs. They're lightweight, compact and comfortable with your choice of either wired or wireless solutions. For presenters with soft voices and those who have extra-rigorous schedules, our Personal PAs are welcome classroom assistants. Most importantly, with these sound systems in place, students can hear more of what is said and that translates to improved understanding and performance!

VoiceSaver™

Directing even small groups can still be a vocal strain in noisy situations or for sustained periods of time. Either of the lightweight VoiceSaver Personal PAs is worn like a clipped on cell-phone and delivers a clearly heard message while giving you hands-free mobility.

- Choice of two models for groups up to 25 or 50 people
- Personal audio complement for leading larger groups, field trips, tours or lectures
- The ideal vocal aid for fatigued throats, strained voices or those needing increased projection who are giving extended presentations, seminars, classes or meetings
- Includes its own specific headset

PA-285

Visual Presentation Solutions

shown with optional roller attachment

Luminos™ Overhead Projectors

Now it's affordable to equip every classroom with overhead projectors from Califone. Like all our other products, these overhead projectors are built to withstand daily use and the constant "bumps" of classroom activity. Choose from two budget-conscious models and use these presentation solutions as a complement to your teaching.

- High quality triplet/doublet lens housed in a dependable open head container
- High/low brightness switch to extend lamp life
- Rugged steel frame/ABS plastic exterior with break-resistant glass for fewer classroom interruptions and repairs
- Dual whisper fans prevent overheating (*most powerful fans in their class*)
- Lamp change for uninterrupted use if lamp burns out during presentation
- Pre-drilled to accommodate optional overhead roller attachment

Califone® Value & Quality in Visual Presentations

Since information is more thoroughly absorbed when students are engaged interactively with visual and auditory content, Califone helps them enhance their audio-based learning with these visual tools. From DVD players supporting multiple content formats (DVD, CD, MP3 & more) to the innovative Luminos™ overhead projector, Califone is answering educators' requests for high-performance, durable visual presentation solutions. With features like full function remote controls, we give you all the right options for integrating visual media into your lesson plans and other presentations.

Today's technology for tomorrow's leaders

DVD's are a growing component of many textbook and supplemental curriculum programs. Our DVD players cover a range of needs, from a karaoke-capable player to a flexible DVD/VCR combination – and we also offer a high-performance DVD writer.

Deluxe DVD Player

- Dolby digital, DVD audio 5.1 and DTS digital output for optimal sound
- Two mic inputs for karaoke activities and student presentations
- Full-function remote control for distant operation
- Supports popular DVD/CD/MP3 related formats

DVD110.....$89

All Califone® ***DVD players*** *are warranted for school use —*

an important advantage over consumer brands.

Califone DVD Learning Centers
see page 19

Portable DVD Player

- Top-loading digital player for convenient desktop use
- Plays DVD, MP3, CD, CD-R/RW formats with full-function remote for classroom mobility
- Headphone jack allows jackbox connection for individual and group learning while not disrupting others
- Portable enough to travel from class-to-class, lab to library, every school day
- AC/DC with foam-lined carrying case for storage and portability required by itinerant teachers and roving audio visual carts

DVD105.....$225

Combination DVD & VCR Player

Helps schools maintain their investment in DVD and VHS materials by bridging current and emerging technologies in one convenient player

- Dolby digital, DVD audio 5.1 and DTS digital output for optimal sound
- Full-function remote control for freedom of movement around the classroom during operation (*not shown*)
- Plays all popular DVD/CD/MP3 formats
- Greater flexibility in lesson planning and delivery with audio and video line RCA inputs

DVDVCR200 (*shown above*).....$258

DVD Writer

Allows simple creation of a DVD with separate audio and VCR inputs

- Internal TV tuner to create your own files
- Highest quality Dolby digital with DVD audio 5.1 output for optimal sound
- Full-function remote control
- Supports all popular playback formats

DVD400.....$395

Learning Centers with Media Players

Califone® Learning Centers:

Improve reading fluency & comprehension

The research is clear. Educators and researchers agree that students develop literacy skills at a faster rate in an audio-rich environment than students who are not. Early reading skill development requires good audibility to develop phonemic awareness, which is an auditory rather than a print recognition process. Using audio materials scored on the Lexile Framework® (which matches reader ability and text difficulty) results in significant growth in reading fluency and comprehension.

Since virtually all recorded text programs have assigned Lexile scores which match students to the appropriate texts, learning centers allow students to listen repeatedly until the material is mastered.

One study observed that students using audio technology stayed on task longer than those who did not. Important skills like fact recall, understanding the main idea, vocabulary development, and appropriate pacing all contribute to comprehension, which is a direct result of more time spent on task.

Using audio technology, like our learning centers, allows students to listen and practice repeatedly at their own pace. By integrating repetition and audio texts, students have demonstrated the same kind of independent growth in reading proficiency as students in teacher assisted programs. For more independent research highlights on audio-enhanced reading, please visit us online.

Packaged to Improve Listening and Learning

Califone® offers complete learning centers combining media players, headphones and jackboxes for groups of differing sizes. These centers are easy to set up and portable so teachers or librarians can carry them from room to room. Available features include variable speed playback, built-in ports for multiple headphones, individual volume controls and carrying cases.

Spirit™ Learning Centers

Best selling Learning Center built to suit two group sizes

Califone® in Literacy Development

"Stone" Audio-Enhanced Classroom Scholarships

The "Stone" Audio-Enhanced Classroom Grants program, funded by Califone and Recorded Books®, aims to encourage development of best practices for struggling readers and to foster a love of reading.

To apply for one of the five grants, teachers and administrators must submit a brief project proposal describing how the Audio-Enhanced Classroom Kit will be used to improve reading comprehension, fluency, literacy development and other reading skills in their classrooms. Each $5,000 grant provides an array of Califone products and Recorded Books' audio books that have demonstrated results in schools.

New research indicates that students using Recorded Books materials to support their reading improved their Lexile scores by 34 percent. Critical to the success of audio-supported reading programs is high-quality audio technology. Poor sound audibility can impair a student's ability to identify words and construct meaning. The unparalleled ability by Califone to deliver superior sound quality is a critical component of this innovative offering.

Don't miss out on this extraordinary opportunity. Click online to download the application for incorporating advanced audio technology and audio supported reading materials to help your struggling readers.

Packaged to Improve Listening and Learning

4-Person Portable CD Learning Center

The first learning center designed for library check-out emphasizing portability and versatility

- Digital CD-102 player (CD-R/RW compatible) for independent and small group activities
- Four Multimedia stereo (3060AVS) headphones
- 4-position Mini stereo jackbox with individual volume controls for customized preferences
- Rigid Carry case with foam-lining

CD102-PLC.....$139

Learning Centers with Media Players

With more and more students learning in multi-sensory modalities, the need to present information differently has never been stronger. And since learning also occurs outside of the traditional classroom, Califone offers a variety of portable learning centers. Whether the need is for audio-based language learning used in a home setting, or studying science based initiatives to meet state standards, our portable CD or DVD Learning Centers can assist your teaching style.

DVD105 Learning Center

Designed for mobile carts and itinerant teachers who require portability and convenient storage

- Top-loading DVD player
- 10-position stereo jackbox (*not shown*)
- 6 Multimedia Stereo headphones w/adjustable headbands
- Foam-lined DVD case

DVD105-PLC.....$315

DVD50 Learning Center

Designed for mobile carts and itinerant teachers who require portability and convenient storage

- Mini-DVD player with bright 7" screen ideal for smaller learning groups and situations requiring shared equipment
- Includes Audio Splitter, two Multimedia Stereo headphones, remote control and foam-lined carrying case

DVD50-PLC.....$375

Expand Your Students' Learning Experience

Help younger computer users as well as special-needs students access technology with brightly colored and developmentally appropriate equipment. Made smaller and without any redundant or confusing buttons, Califone computer peripheral equipment helps make technology more accessible to primary aged students and classrooms with shared uses of computers.

Whether you're working with individual students or the entire class, Califone computer peripherals meet your needs and help stretch budgets. Our audio splitter, for instance, enables two students to work on a computer project together and hear audio in their headphones.

Kids Computer Package

New!

Engage your beginning computer users with this bright & fun-colored beginning computer package.

Package includes:
- One KIDSKEY Keyboard
- One KM100 "mini mouse"
- One red Listening First headphone (2800-RD)

KIDSPACK.....$49

Mini Mice™

KM200

- Down-sized for the unique needs of children's hands
- Optical tracking makes even beginners more efficient
- Bright fun colors to hold interest and stimulate computer activities
- Guaranteed for 1 million clicks
- Smaller and easier for little hands to grasp (*cute too!*)

KM100 *Wide*.....$10
KM200 *Narrow*.....$10

KM100

Computer Peripherals

Kids Keyboard™

Kids Keyboard won the prestigious 2007 Teachers' Choice℠ Award

- USB Keyboard with PS2 adapter
- Color coded to help beginning users easily identify and locate numbers, vowels and consonants
- QWERTY format introduces standardized keyboard layout

Media Players

Listen to the Sound of Active Learning!

Long after the last bell of the day, Califone® media players will still be hard at work. They're designed specifically for school use so they're rugged, durable and easy-to-operate, even for the littlest hands. Built beyond the industry's most rigorous standards, our steel grille coverings protect the recessed speakers from damage. The tough ABS plastic exteriors withstand inevitable impacts. Features on the flagship Performer Plus™ include: programmable CD player and digital functioning, built-in microphone records student progress on tape, variable speed playback (essential for language learning, dance and music classes) and 5 built-in headphone ports that eliminate the need for a jackbox. With CD-R/CD-RW compatibility, Califone boomboxes can play CDs burned at school so students can record their work and you can keep it for their portfolios.

- Dual volume controls for individualized preferences
- Dual plug sizes to fit any media player
- Cleanable & replaceable cushioned leatherette ear pads help ensure student health

3068AV.....$14

Califone: ELL Support

Listening and speaking skills...

"...provide one of the most important building blocks for the foundation of second language acquisition and are essential for developing reading and writing skills in English."

CA Standards for English Language Learners

The wording may vary from state to state, but the idea that good listening and speaking skills are essential to achieve proficiency in English is now commonly held. Current estimates are that 12% of all pre-K to 12th grade students are non-English speakers, and that by 2015, more than 50% of our students will not have English as their first language.

Unless you have a teacher with clear diction, standard pronunciation and time to review lessons again and again, your ability to become fluent is significantly handicapped.

The use of media players are an invaluable tool to English learners as they provide clear audio for the development of phonemic awareness, vocabulary, and the pacing, intonation, and expression necessary to achieve fluency. Media players are the perfect tool for the job. They allow continual repetition of lessons until students achieve success.

Learning English is just the first step in the process for non-English speakers. They need fluency before they can begin to master the rest of the curriculum. Media players engage students, allow them to clearly distinguish one sound from another, repeat lessons as many times as necessary for mastery, and propel them to fluency and overall academic success.

Media Players

Play it again… and again!

In listening centers and libraries, rugged durability is essential. That's why our cassette players and recorders have been expressly designed to withstand constant daily use. Califone wired and wireless cassette players are reliable, safe and rugged – and they deliver high-quality sound day in and day out. Each product in our lineup is constructed with shatter-proof ABS plastic casings and permanently attached cords. They are C-UL and CE approved safe for both classroom and library uses — unlike products available at a consumer electronics store!

Deluxe Series Player/Recorders

- Educator tested and proven in library and classroom listening centers, music and movement, language, story-time activities and playback of recorded books
- Seven built-in headphone jacks for independent study or group learning
- On/Off public address capability adds versatility and reliability in unforeseen situations
- "Directional Sound" feature projects audio out to class instead of up at ceiling
- Built-in electret mic that can't be misplaced for recording student progress or class projects
- Aux in and remote mic connections add classroom flexibility
- Built-in "auto-stop" feature helps protect tapes and extend their longevity
- Permanently attached three-wire cord for student safety

Headphones & Headsets

Califone® Sets the Standards for School Headphone Quality, Reliability and Student Protection

No other headphone manufacturer offers as many choices and product features specifically designed for educational uses as Califone. Califone reset today's standards with the introduction of the first headphones to provide protection against the growth of a broad range of bacteria, mold and mildew.

Our new antimicrobial headphones include the same reliable features found throughout the entire line of Califone headphones and headsets. They are built to withstand the rigors of daily classroom and library use and deliver the crisp, clear audio students need to tune in to learning, which is particularly important for young readers who are building skills in phonemic awareness, comprehension, fluency, vocabulary and phonics. In addition to language lab uses, our headphones and headsets are ideally suited for 1:1 instruction in computer labs, multimedia workstations and in speech pathology applications.

Besides the newest antimicrobial protection, our other headphones and headsets also feature ambient noise-reducing earcups to tune out external distractions and keep students on task. Rugged ABS plastic construction is also standard for added durability with safety-design recessed wiring for an extra measure.

When It's Important for Students to Listen… Califone® Headphones are the Educators' 1st Choice.

Califone® has revolutionized headphone and student protection by incorporating an antimicrobial compound to create the next generation of Monaural and Switchable Stereo/Mono headphones. Providing protection to prevent the growth of a broad range of bacteria, mold and mildew, this material is the first of its kind to be used within audio-assisted products and is EPA registered, FDA listed and NSF certified.

Find an authorized Califone dealer online at **califone.com/dealer**

Enter monthly drawings for a chance to win free products at **califone.com**

Califone® introduces the first antimicrobial headphones for student protection

The antimicrobial compound attacks multiple targets in the microbe to prevent it from growing to a destructive population.

The compound interferes with cell growth in three ways:
a. It disrupts transport functions in the cell wall
b. It inhibits cell division
c. It interrupts cell metabolism

Antimicrobial Switchable Stereo/Mono Headphone

1/4" adapter included

- Ideal for monaural language applications and stereo needs of computer workstations
- Individual volume control
- Adjustable & padded headband
- Ambient noise-reducing earcups block external distractions and keep students on task

- Cleanable and replaceable cushioned leatherette earpads

3068-AM.....$17

Antimicrobial Deluxe Monaural Headphone

- Our most rugged headphone holds up to frequent student use in language labs and self-guided story time
- Most popular choice for ESL and ELL applications
- Ambient noise-reducing earcups block out external distractions to keep students on task
- Slotted baffles prevent accidental perforation of the internal speaker
- Adjustable headband with durable ABS plastic
- Replaceable foam-filled ear cushions
- Permanently attached coiled cord with 1/4" plug
- Cleanable and replaceable cushioned leatherette earpads

2924AVP-AM.....$18

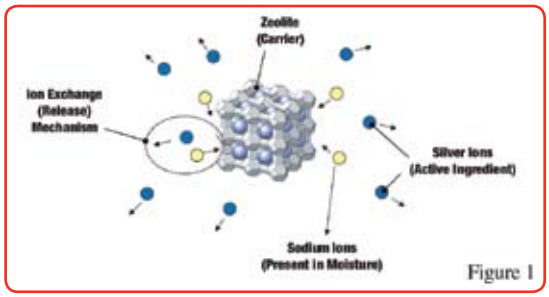

Figure 1

Technology Behind the Performance

The multi-faceted zeolite crystal carrier provides a three dimensional release mechanism (Figure 1) that provides efficient release of silver ions independent of particle orientation in the substrate.

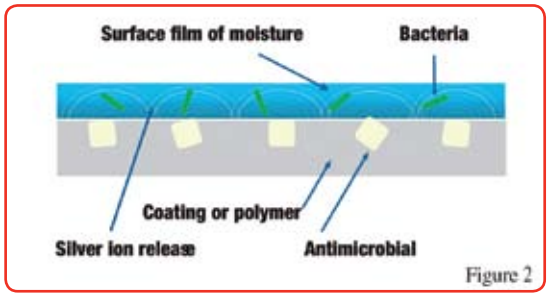

Figure 2

Activation

Silver is a powerful antimicrobial metal ion. Figure 2 shows the ion exchange process. Zeolite crystals containing silver ions are randomly oriented and distributed through the surface of a polymer or coating. In conditions that support bacterial growth, the sodium ions, in ambient moisture, exchange with silver ions at reversible bonding sites on the zeolite. The exchanged silver ions are now available to control microbial growth.

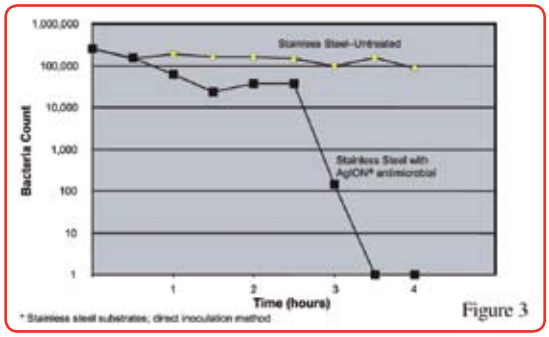

Figure 3

Method of Control

In many applications, the antimicrobial compound has been shown to provide microbial efficacy within hours (Figure 3) while maintaining optimal performance for years.

The outer shell of the headphone uses a chemical reaction to battle bacteria and viruses which will maintain optimal performance for years. Since the chemical reaction repeats itself over and over again, it makes the headphones self-cleaning.

Headphones & Headsets

Our durable headsets are a staple in language centers and used by students of all ages. Most models are now equipped with USB plugs to fit computers, making them the perfect choice for labs, workstations and VOIP applications such as group calls. Like our headphones, Califone headsets are made with dependable ABS plastic for durability, protective baffles over the internal speakers, ambient noise-reducing earcups and padded leatherette ear cushions for comfort.

3064AV

The AX-14
connects 3.5mm plug headphones to a USB port
see page 23

Multimedia Stereo Headset

- Universal compatibility with all computer formats as USB plug eliminates the need for a sound card
- Adjustable boom microphone for language and VOIP uses
- In-line volume control and windscreen reduce unintentional sounds during recordings

3064-USB.....$39
3064AV *3.5mm plug*.....$15
3064AVBL *Blueberry, 3.5mm plug*.....$15

Deluxe Multimedia Stereo Headset

- Ambient noise-reducing earcups (with volume control) diminish external distractions
- Slotted baffles prevent accidental perforation of the speaker
- Cleanable & replaceable foam-filled ear cushions
- Adjustable headband made from durable ABS plastic
- Universal compatibility with all computer formats as USB plug eliminates the need for a sound card

3066-USB.....$53
3066AV *3.5mm plug*.....$42

2964AV *Monaural version equipped with two 1/4" plugs, used with the 2010 & 2020 CardReaders (see page 41)*.....$34

3066-USB

USB Headset

- Backwards compatible USB 2.0 connection is faster for better listening and vocal recording
- In-line mute/volume control eliminates the need for a sound card
- Universally applicable with current Windows and MAC formats
- Durable ABS plastic earcups withstand day-in and day-out use
- Adjustable comfort sling headband fits all sizes
- Flexible boom microphone for language and VOIP uses
- Double-reinforced strain relief cord connector won't pull out

4100-USB.....$49
4100-10 *Ten-pack with carrying case (not shown)*.....$490

Infrared/USB Headphones

Developed for situations when multiple students listen to audio from a single computer

- Detached transmitter connects to a computer's USB port and transmits wireless stereo to headphones
- Each headphone receives the signal from the transmitter
- 5' line of sight transmission ideal for computer labs with multiple stations
- Optimal reception when students gather in a semi-circle in front of the computer (transmitter)

35IR-USB *Wireless Headphone with Infrared USB Transmitter*.....$63
35IR-B *Wireless Headphone without Infrared USB Transmitter*.....$44

See also **USB Listening Center** *on* ***page 20***

Infrared Headphones

- Cost-effective way to create wireless learning for students
- Used with the Infrared Cassette Player/Recorder **3432IR** (*page 31*) and Infrared Music Maker Plus **2395IR** (*page 27*)
- Provides freedom of movement
- Volume controls for individual preferences
- 15' line of sight range (*optimally worn by multiple students when forming a semi-circle in front of transmitter*)

34IR.....$29

Wireless Listening System

- Brings wireless audio to a limitless number of listeners (*within transmission range*)
- Can be used with up to four different groups at the same time
- Transmits audio from any computer or media player
- 100'+ transmission range to headphones
- Choice of four separate frequencies, each with color-coded hardware for easy identification and use

CLS7XX-4 *Includes four wireless headphones with matching wireless transmitter and patch cord to connect with media source*.....$280

Wireless VHF/FM Transmitter

- 1/4" Audio input from any multimedia source (mono or stereo input)
- 1/4" Mic input transmits teacher instructions wirelessly through to headphones

CLS7XXT.....$79

Wireless Headphones

- Wireless headphone reception promotes flexible & independent learning
- 100'+ wireless range with individual volume control

CLS7XX.....$52

Califone® offers a unique approach to early literacy with Action Fundamentals™.

Targeting a wide range of students' learning styles and reading levels, these tools make it easy and engaging for students to link visible letters with the sounds they hear. Students select a card, listen to the pre-recorded sound, record a response and compare the two recordings. Blank magnetic cards can be recorded on and re-used while saving money. The recorded cards are color-coded, numbered and indexed so the system is easy to set up, use and then tuck into their own sturdy box for the next time. It's a system that uses strategic repetition and multi-sensory learning to help students make the vital connection between the words they say and the words they read.

READER

- Cost effective, player only without record function
- Lightweight & portable with AC/DC capability
- "Play and listen" operation for unsupervised learning and operation

READER.....$49.95

Califone Card Readers are ideal as teaching aids for use as enrichment tools for students who are performing just slightly below grade level and for ESL & ELL applications. They are the perfect solution to enable students to work on their own when a teacher or aide is temporarily unavailable to work with them.

Readiness

Topics include; 8 basic colors; 6 basic shapes; numbers 1 thru 10 with one card showing each number, domino illustration and spelling; 26 alphabet cards A-Z. Includes Teacher Resource Materials, 4 overhead transparencies, 4 reproducible student worksheets and 50 full-color cards with each card showing an illustration & printed word.

MCFR1.....$84

Use our supplemental Card Reader products as a teaching and enrichment tool for students who are performing just slightly below grade level.

Compound Words

- Familiar, high frequency compound A-Z words, 72 full-color cards

MCFCW1.....$77

Picture Words

- High frequency Dolch list words A-Z
- 72 full-color cards

MCFPW1.....$77

Rhyming Words

- Familiar, high frequency rhyming words to introduce and reinforce the basics
- 86 full-color cards with each card displaying two words and imaginary illustrations

MCFRW1.....$86

Phonics

- Initial and Final Consonants, Vowels, Consonant and Vowel Digraphs
- 88 full-color cards, each card shows two illustrations and words for the applicable phonic element
- Includes Teacher Resource Materials, 4 overhead transparencies, 4 reproducible student worksheets

MCFP1.....$78

Califone: Differentiated Instruction

Not all students learn in the same way.

Established brain research tells us that human beings learn & process information in very different ways. Differentiated instruction means that each child should be able to learn in their preferred learning style. No longer is it the student's responsibility to adapt to the curriculum, but it's the teacher's responsibility to make sure that the curriculum is available in multiple formats that support a variety of learning styles.

This requires a great deal of teacher flexibility and a willingness to put the student's needs first. Audio technology can significantly aid this process by simulating the one-to-one teaching experience. Because students can listen to instructional material individually or as part of a group, media players and listening centers allow teachers to effectively reach students with a range of learning styles. While working individually with struggling learners, the teacher can direct the other students to use the listening centers for independent work. Using these audio tools allows the teacher to use their class time more effectively & enhances their teaching experience because they are able to reach more students.

Card reader products also address the difference in learning styles by providing another avenue for additional practice. Students select a card, listen to the pre-recorded sound, record themselves making the sound, & then compare the two recordings. This multi-modal approach (kinesthetic, visual and auditory) helps children make the vital connections between the written and spoken word.

Installed Audio Systems

Wired or Wireless... They Can Hear You Now

Wireless

MP3 Capable

Safety Standards

Count on the expanded PresentationPro™ lineup to handle both indoor and outdoor amplification needs. Engineered for quick and easy set-ups so you can integrate wired and wireless microphones, MP3 players, control audio levels remotely and even run wireless audio from remote LCD projectors (see page 45).

In many classrooms, the majority of listeners with adequate hearing can only understand 75% of the words read from a list. Poor acoustics and distracting background noises like heating and air conditioning systems can also adversely affect listeners' ability to clearly hear oral instructions, which is a decisive factor in comprehension, on-task behavior and ultimately, student performance. Sound field amplification supports better teaching and learning opportunities. Our installed audio solutions provide optimum audio enhancement with better sound distribution from front to back and side to side.

We've made these solutions affordable too so you can equip multiple classrooms. And we've also made sure our systems support connectivity with multiple microphones, computers, LCD projectors, TVs and other peripheral audio equipment.

See more **wireless microphones & accessories** *on pages 7*

PresentationPro+UHF™

For classrooms, auditoriums, meeting rooms, hotels, conferences and presentations

- Accepts a) one 16-channel UHF and b) two wired mics at the same time
- Connects with computers, LCD projectors and multimedia players through two inputs
- LED lights give assurance with visual confirmation of power, signal and reception
- Line output to additional wired speakers for larger presentations
- Heaviest magnet in its speaker class (*most efficient*)
- Rugged brass sunburst teeth won't slip after installation
- Shared wireless mics with the PowerPro, FreedomPro, Lectern, UHF Array Speakers eliminate dedicated mic equipment needed for separate PA systems (*see page 7*)

PA300+UHF.....$366
PA300+ *Wired version*.....$200
MB-350 *PresentationPro mounting bracket sold separately*.....$55

Wireless UHF Microphones

- 150' range adequate for assembly halls and allows movement during outdoor events
- 16 selectable UHF channels provide choice for optimum transmission

Upgrade Your Existing Wired PA to Wireless!

Our wireless transmitters and receivers easily connect with your own system so presenters can move freely and engage their audiences, turning standard assemblies into interactive experiences and making special events even more memorable.

Create Your Own Wireless Mic System

New!

- Includes R-16 receiver and Q-316 mic
- Creates immediate cord-free microphone and wireless audio receptivity
- Connect the 16-channel R-16 to your existing wired system
- Set channel on R-16 to match frequency on Q-316
- Q-316 mic transmits audio to the R-16 receiver, which connects to your existing wired PA system

QR-16.....$255

Q-316
microphone

Create Your Own Wireless Media Playing System

New!

- Includes R-16 receiver, LCD-16 transmitter, LM-316 mic
- Gives immediate wireless capability to a computer/media player to connect with your own existing wired PA system
- Connect the LCD-16 transmitter to your media source
- Set channel on R-16 receiver to match the frequency to the LCD-16 transmitter and connect the receiver to your existing wired system
- LM-316 mic can be used with LCD-16 as a wireless mic

LCDR-16.....$330

LM-316
microphone

Wireless LCD Transmitter

- Creates instant wireless 16-channel UHF transmission (50' range) from any audio source
- Upgrades the traditional audio cart into a high-tech tool with cable-free access to professional quality sound
- Individual volume controls for mics (XLR and 1/4"), stereo auxiliary inputs on RCA connectors

LCD-16.....$144

LCD-16
front & side views

Universal Transmitter

- Connects with LCD projectors to transmit the wireless audio segment of multimedia presentations
- Single connection for easy and fast setup
- 100' wireless audio transmission range from any audio source

TR-16.....$205

TR-16
front & rear views

Our wireless transmitters and receivers work with PowerPro, FreedomPro, PresentationPro, Lectern and UHF Array Speakers

Universal Receiver

- Upgrades any wired speaker or media player to a wireless receiver
- Creates cable-free reception for conventional wired PA systems and classroom, assembly hall multimedia players for flexibility in lesson planning and student activities
- Converts existing multimedia players and even large wired speaker systems into wireless
- 150' wireless reception range from any Califone wireless mic (*see page 7*)

R-16.....$180

R-16
front & rear views

Infrared Classroom Audio Enhancement System

The benefits of an enhanced sound field amplification system have long been documented (click on califone.com/research for more highlights). However, four significant obstacles to widely implementing such a system have been excessive cost, substandard installation, poor classroom acoustics and high levels of ambient noise. Califone overcomes these hurdles with its PI30-IRSYS, the first affordable Infrared Classroom Audio System. By offering all the benefits of wireless audio reinforcement without interference from adjacent classrooms, this innovative system increases the key signal-to-noise ratio by utilizing "array" speaker technology to produce a more evenly distributed sound with twice the coverage and receptivity of comparable systems.

Features

- Infrared audio enhancement system offers all the benefits of wireless sound field amplification without interference from adjacent classrooms
- Includes two ceiling-mounted infrared receivers for improved audio reception. Sensors are powerful enough to accommodate rooms up to twice the recommended 1,000 sq. ft. size for elementary-level classrooms
- "Array" speaker technology provides greater coverage and reception as well as even sound distribution
- Includes two non-powered "Array" speakers (PI30-SP) which increase the desired signal-to-noise ratio by targeting the sound pattern directly at the audience instead of bouncing random sound off walls (*which raises the ambient noise level*)
- Includes a rechargeable belt-pack transmitter (*with headset*) for the educator and a wireless handheld mic for student use, batteries not included on both mics
- Includes wall-mounted and lockable metal console to store microphones and the (*volume, bass and treble*) controls as well as the line inputs/outputs for computers and media players

PI30-IRSYS.....$950
PI30-INST *Installation of system (see insert below)*.....$425

Rechargeable belt-pack transmitter with headset

Two ceiling mounted infrared receivers

New!

Two non-powered array speakers

Wall-mounted control panel & wireless mic

Proper installation can be a critical factor to ensure that everyone in class receives full benefits from your Infrared Audio System. Since our pledge of delivering a fully-installed, wholly functioning system won't be fulfilled until your PI30-IRSYS is set up to the highest standards, Califone has partnered with the nation's largest installer of satellite TVs so this can be done without compromise. With your purchase of the "PI30-INST" option, your Califone Infrared Audio Enhancement System will be properly set up to national standards by a qualified and trained technician.

Click on califone.com for more details.

New!

Installed Audio Systems

PI30
Powered speaker with line-in, mic and DC functioning, 16-channel UHF wireless reception

PI30-PS
Powered speaker with line-in, mic and DC functioning (non-UHF)

PI30-SP
Non-powered, non-UHF

"Array" Speakers

- "Array" technology targets the sound pattern directly at the audience instead of bouncing the sound off walls
- Increases desired "signal to noise ratio" while avoiding increasing ambient noise levels in the room
- Provides a more evenly distributed sound so students at the rear of the room hear the same volume as those in the front
- 15 Watt RMS with 3 high-performance neodymium magnets create a lighter speaker (<4 lbs) for easy installation
- Each of the three array speaker models INCLUDES necessary wall-mounting hardware (MB-30)

PI30 *Powered speaker with line in, mic and DC functioning, 16-channel UHF wireless reception*.....$199

PI30-PS *Powered speaker with line in, mic and DC functioning (non-UHF)*.....$175

PI30-SP *Non-powered, non-UHF*.....$99

NEW! **PI30-LCD** *Includes one PI30 array speaker with a 16-channel UHF transmitter (LCD-16 shown below) for complete wireless audio transmission from LCD projectors, computers and other media players*.....$339

Utilize full wireless potential of the PI30 with the LCD-16 transmitter

LCD-16 *front & side views*

Wireless LCD Transmitter

- Creates instant wireless 16-channel UHF transmission from any audio source
- Upgrades the traditional audio cart into a high-tech tool with cable-free access to professional quality sound presentations
- Individual volume control for mics (XLR and 1/4"), stereo auxiliary inputs on RCA connectors

LCD-16.....$144

Califone: Assistive Technology

Helps Every Child Learn

Audiologists and speech pathologists advocate using sound-field amplification systems to overcome individual classroom challenges in order to deliver crisp sound to students. "Auditory brain processes aren't fully developed until the mid-teens, and children don't have enough life experience to fill in the gaps when they miss information. They need a greater signal-to-noise ratio than adults," asserts Karen Appold in "Advance for Speech-Language Pathologists and Audiologists".

Research has shown that utilizing PA systems: improves academic achievement; increases time-on-task; decreases test-taking time; improves language growth; reduces the special education referral rate; does not stigmatize children with hearing loss; and enhances other multimedia instructional equipment. When students hear clearly they can experience the powerful combination of sight and sound that multimedia brings to life.

With high levels of ambient noise & the prevalence of poor acoustics in classrooms, all students experience difficulty in hearing instructional material, particularly if they are seated at a distance from the audio source or due to excessive noise and reverberation inside the classroom.

Poor acoustics and excessive ambient noise can be overcome with appropriate audio technology & have a significant impact on learning and achieving AYP goals. Our audio tools can help you create solutions to overcome these challenges.

New!

Antimicrobial Headphones

The first headphones to inhibit the growth of harmful microbes on its surfaces.
